SUMMARY:

As a Web Developer, I have gained valuable experience in various web development tools and technologies, including HTML, CSS, JavaScript, Bootstrap, jQuery, React, Node.js, JSON, API, and MongoDB. I have completed several projects, such as developing a JavaScript app that communicates with an external API, creating a RESTful API from scratch using Node.js, designing a client-side frontend for the RESTful API with React, building a serverless, progressive web app that fetches data from the Google Calendar API, developing a chat app with advanced functionality using React Native, and creating a version of the React app using Angular. In addition, I have experience with agile development methodologies, version control using Git, and deployment on cloud platforms like Heroku. I am passionate about web development and am eager to continue learning and utilizing my skills in a professional role.

SKILLS:

- Proficient in HTML, CSS, JavaScript, Node.js, React, JSON, API and MongoDB
- Familiarity with agile development methodologies, version control with Git, and deployment on cloud platforms such as Heroku
- Excellent writing and interpersonal skills
- Ability to manage large partners and sustain profitable business partnerships
- Highly organized with excellent attention to detail
- Ability to react under pressure, use good judgment in ambiguous situations, and be flexible/adaptable
- Ability to ensure a high level of service and quality is maintained.

EXPERIENCE:

<https://rushdihijab.github.io/PF/> , Centerville, VA (2022 - Present)

Web Developer

- Developed a JavaScript app that communicates with an external API
- Created a RESTful API from scratch using Node.js
- Designed a client-side frontend for the RESTful API with React
